

Koala food plants

The foliage of these plants is eaten by koalas. In general, wild populations of koalas have one or two Eucalypt species as their main food source, with other species browsed infrequently at particular times of the year.

- *Angophora costata*
- *Corymbia maculata*
- *Eucalyptus botryoides*
- *Eucalyptus camaldulensis*
- *Eucalyptus cinerea*
- *Eucalyptus dalrypleana*
- *Eucalyptus globulus* ssp. *globulus*
- *Eucalyptus goniocalyx*
- *Eucalyptus grandis*
- *Eucalyptus leucoxylon* ssp. *leucoxylon*
- *Eucalyptus leucoxylon* 'Rosea'
- *Eucalyptus melliodora*
- *Eucalyptus microcorys*
- *Eucalyptus nicholii*
- *Eucalyptus obliqua*
- *Eucalyptus ovata*
- *Eucalyptus punctata*
- *Eucalyptus regnans*
- *Eucalyptus robusta*
- *Eucalyptus saligna*
- *Eucalyptus sideroxylon*
- *Eucalyptus viminalis* (both ssp.)
- *Lophostemon confertus*
